Good Morning

I respectfully oppose the offshore wind project proposed for Delaware and Maryland

This project will be detrimental to the economy of the beach community that supports many jobs and the States tax revenues ,

The Fishing Industry will be decimated causing the demise of the seafood our coastal fisherman provide to the community and surrounding States .

This industrial complex off our shores hasn't been proven to be safe to humans, wildlife and our National Defense .

Please vote against this project

Thank You,

Janice Bortner
