Organization:

Comments:

I am opposed to the US Wind project. This will cause pollution. When the turbine blades break like they did recently in Nantucket our beaches will be closed. The wind farms will kill birds. Our state park land is not there for you to profit by leasing it for industrial use. This is wrong on so many levels. I was in Wyoming and 5 out of a hundred turbines had broken blades so broken blades are a common occurrence. Every time that happens our beaches will be polluted with fiberglass debris. Park City Wind off the CT coast is not economically viable and not going to supply energy to anyone. We are going to end up permanently altering and polluting our precious environment to build wind energy infrastructure that cannot economically provide power. This infrastructure will most likely be idled and abandoned. It will be come a permanent eyesore and an ongoing source of pollution and environmental degradation. I have no idea why we are even seriously considering these projects.
