Comments:

I live in Millville, Delaware. Please do not let them use 3 R's Beach for the power of the wind turbine. I can't afford to pay my electric to maintain those things that I hear break a lot, and there is no land to fill with these things when they do break in their not recyclable and the sonar mapping for these kills the marine life that uses echolocation and more. I'm very upset with our government, allowing these foreign companies trying to sell us a product that's really just a big money scam. And I don't know how human beings don't feel so guilty inside for allowing this.
