Subject: Wind Farm off the Delaware Coast
Date: Monday, June 3, 2024 7:31:17 PM

Dear sirs,

While I am unable to attend the hearing scheduled for 6/4/2024 due to a prior commitment, for the record I am vehemently opposed to this project. With the understanding that its purpose is to provide a “renewable” source of power that will offset the environmental impact of fossil fuels and help stop “climate change”. Research has shown that climate is a natural phenomenon of our planet that has been constantly changing since the earth was formed. This wind farm, a terrible blight on our beautiful coastline, will be minuscule in its impact on our climate; to say nothing of the fact that the power to be generated will serve only Maryland and not Delaware.

I am outraged that my early morning view of the horizon, as I cast my line out beyond the surf and settle in for a day’s fishing at 3Rs beach, will be ruined by an ugly concatenation of spinning windmills across the spectrum. Have you thoroughly studied the negative impact this will have on the tourist trade... the economy of the area?

Please do not proceed with this asinine project!

Respectfully,

John W. Kerlish
