Good day - I live in Fenwick Island DE and I OPPOSE the offshore wind project off the coast of Ocean City, Maryland.

I oppose it because of

1. Visible alteration of the view from the shoreline - the windmills are too tall & too close to shore resulting in property value reductions
2. Lighting could impact seafare & bird migrations
3. Harm to marine life, bird strikes, fishing and boating industries
4. Night lighting interferes with star gazing

Thank you

John W. Verlaque
