Comments:

I am concerned about the shallow cable placement of the high power transmission lines proposed across the 3Rs beach, wetlands and the bay. We're talking about mega watts of power being set only 3 feet below the surface in an area that has many feet of drifting sand above and below the water level. There are many boaters, skiers, tubers, clambers and fishermen that will be way too close to these transmission lines. We don't need this danger in our waterways or anywhere else. I am also concerned about the noise from the drilling at 3Rs. I'm only a half mile from 3Rs with many other homes a lot closer. The homes that are this close to the Virginia Beach landing have constant loud noise and vibrations 24/7. We don't need this disturbance. Thank you for your consideration.
