Please, please no wind turbines! They are bully by foreign countries and you are putting our energy needs into outside the USA companies. Don't litter our coastline with these mammoth towers and bring the lines in shores to our beaches. We do not know enough about the placement and to dismantle after useful life is not part of the plan. It will fall on the taxpayers to maintain and dismantle. Electric costs will go up. It is not in our control only the foreign companies who own these. There is growing evidence that these are bad for the environment, bad for our health, bad for our wildlife, it is becoming more evident that this green movement is anything but green.
