Comments:

No to the windfarm project . It is irresponsible to push these inefficient , expensive , unreliable turbines with unknown environmental impacts. No one wants to see these at our beaches, and no one wants our bays destroyed by the cables running through them. Wind companies are struggling to make profits, and tax payers should not be liable to subsidize them. When these companies go under, who is going to be responsible for ensuring that the turbines don't rot away in our water?
