Comments on Docket #2024-P-MULTI-0007 -- US Wind Project

Name: Kevin Coupe

Phone: 6465735662

Email Address: kcoupe67@gmail.com

Organization:

### Comments:

I am against the USWind project for a variety of reasons. Committing to large scale projects such as this when there is still so much that is not known about the impact of the project is premature and foolish. Reasons to not move forward with this project at this time include: 1. Danger to marine life 2. Negative environmental impact of construction. This concern is largely ignored in conversations, but the process of building large wind farms will require a significant amount of "unclean" energy. 3. The huge negative environmental, safety and economic impact caused when a turbine breaks as the one off the coast of Nantucket did. A strong storm / hurricane could be devastating. 4. Wind power is very inefficient. More focus/research should be placed on alternative non fossil fuel energy such as nuclear or hydrogen.
