Organization:

Comments:

I strongly, and respectfully, oppose this project on the basis of the damage it will cause to our coastline, the Marine mammal population, and the immediate surroundings to the inland areas. Studies have proven the mortality rate of Marine Mammal populations in the areas of these "farms" rises dramatically due to the seismic intrusions as well as the EMF. The power generated by said mills has been shown to be minimal, and not sufficient enough to provide power to an average neighborhood. Our coastline is the single biggest asset we have, and we need to protect it. The tourism industry will be impacted greatly by loss of revenue. Who wants to sit and stare out at a bunch of fans?
