**Comments:**

In all that I have read about and listened to from wind farm representatives, I have not been convinced that there is enough to substantiate the claims of safety of marine life, national security due to radar interruptions, the possibility of damage from a category 3 hurricane and ramifications of what happens to obsolete wind turbines at the end of their useful life expectancy. I am also no where near convinced that our power bills will not increase significantly. I am against the wind farms off the coast of DE and MD.
