Email Address: eaglelounge@msn.com
Organization: No

Comments:

I am deeply concerned about this project! I'm concerned: 1)- for the horseshoe crabs(necessary for medical/ cancer treatments) that breed in the area 2) eyesore 3) destruction and harm to sea life and ocean floor 4) when in Hawaii and other coastal areas only about 1/3 of the turbines work- they say they will maintain - but locals say they never have. 5) that they after building they can sell them to highest bidder- even foreign entities belonging to our enemies(like China). 6) having that much power coming up on the beaches that DE residents use and live nearby will be hazardous to their health 7) this power coming into DE beaches and destroying our natural view isn't even power for DE- but for Md - makes no sense. This whole thing makes no sense. Please vote against destroying nature and our safety. Thank you!
