Organization: NO

Comments:

Please don't build these windmills. I have been all over the US and have seen firsthand that these windmills only work about 15% of the time, and they sit idle the rest of the time because they need to be repaired which rarely gets done. They will be an eyesore on the community and those vacationing on the shore. They cause many problems with our wildlife with birds crashing into them and will affect the wildlife found beneath the ocean as well. I'm for finding solutions to our energy problem, but this isn't the way to go. Delaware residents won't gain a thing by installing these windmills, and if they break down or cause a fire, they will contaminate the surrounding areas.
