Organization:

Comments:

In regards to the approval of Wind lease areas, sonar mapping and construction please takes this submission as my absolute opposition to these projects. First and foremost they don't work and they are slaughtering our Marine mammals. Over 140 Whales since 12/22. 140+ read that again. That is not counting the mass Dolphin strandings and porpoises and Sea Turtles. Everywhere these projects have shown up destruction follows. Look what is happening in VA Beach right now. Dead humpback whale last week. Dolphins the week before. Residents housing shaking, foundations cracking. People and Marine life being driven mad by the pile driving. The Delaware AG has already gotten involved since this was all done behind closed doors just as it has been up and down the East Coast for the last almost two years now. The Turbines are leaking oil, yes oil...fossil fuels in Cape Cod. There is toxic debris floating near Martha's Vineyard. The only green energy here is \$\$\$ in the Developers pockets and the politicians slotted to profit. All regulatory agencies have taken "donations" and are therefore compromised. Everyone wants energy solutions. This is not it. We fight everyday to stop this madness and will continue to do so. It is your job to protect our Ocean, our Coast it's residents and our Fisherman. No one wants this, no one was asked and no wonder it has been kept secret with no reporting. It is an absolute disaster in the making with devastating perhaps irreversible ecological and financial consequences. Look at the facts not the propaganda. Please do the right thing. Our world cannot exist without an Ocean. Thank you..MaryBeth Feeney.
