### Comments:

The debate that has been raging about the of wind turbines off the coast of Delaware needs to end. All Americans need to come to the realization that we must embrace renewable energy. We have no choice since our current reliance on fossil fuels is only a temporary solution - until we run out! Not to mention that burning fossil fuels exacerbates our global climate crisis and makes the planet more inhospitable for human habitation. Please put his matter to bed and move forward with wind turbines - a way to power our electric needs that doesn't rely on fossil fuels. Thank you.
