Comments:

I'm a property owner as well as a business owner in Ocean City Maryland. I have been to hearings and witnessed thousands of people protesting the offshore windmills. As a resident of Ocean City I truly believe that windmills in the Atlantic Ocean will not endure the elements for a very long time. Eventually they will be abandoned and by that time the damage will have already been done. Look at what has happened recently off the coast of Maine. Please Stop this project to help sustain a healthy environment.
