Comments:

I urge you to vote against allowing US Wind to build a wind farm off of Delaware's beaches. Not only have there been some significant environmental harms from wind farms, including sharp, broken wind blades washing up on beaches in other locations causing closure of beaches, but the high cost and of the energy produced from wind farms in many cases have caused electric prices to increase significantly and to reduce the value of the land for the residents in the areas where wind farms have been built. Please put the environment and the needs of your citizens first and do not allow a Wind farm off our shoreline.
