Organization: Tower Shores Beach Association

Comments:

As a Tower Shores home owner I am extremely concerned about the proposed plan to construct four Offshore Export Cables offshore in the state park and then make landfall at 3R's Beach or Tower Road in Delaware. Such a plan would be extremely dangerous to the health and well-being to the private property and homeowners in our community based on the projected plan to carry approximately 1,100 megawatts of electricity under the ocean and onto a beach which is so close to our community. The proposal for the construction of projects of this kind have been rightfully rejected by other sought after sites for the same reason that we are rejecting it and the State of Delaware needs to follow suit in order to protect its citizens potentially impacted by life-threatening results should it be approved. A more detailed summary of our community concerns is thoroughly presented in the previously posted comments provided by our association's president, Elizabeth Frazee,,dated September 2, 2024
