Organization: No

Comments:

Vote No on US Wind permit applications Docket#2024-P-MULTI-0007 1. Project is located off the coast of Maryland for Maryland consumers. Let the State of Maryland figure out how to make this project work. 2. Zero benefits yet many risks and costs for Delaware and it's residents. 3. DNREC needs to follow their mission to continue to protect the natural resources of the proposed areas, not damage nor destroy these areas by allowing industrialization by US Wind. See Vineyard Wind turbine failure off the coast of Martha's Vineyard and the damage done to neighboring beaches and marine life. 4. The Indian River Inlet is environmentally fragile as evidenced by the recent ocean breach on the north end. Let's not add projects in this area that will cause further weakening. 5. Protect the established ecosystem of the Indian River Bay particularly the horseshoe crabs. Thank you DNREC for making the right decision for the residents of Delaware.
