Subject: Wind turbine project

Totally against this offshore project for the following reasons:

This legislation is more the product of ideology and blind optimism than a balanced approach to weighing the advantages and disadvantages of offshore wind power," said [State Rep. Rich Collins \(R-Millsboro\)](#). "Proponents tout the 'clean' aspects of turbines while ignoring the significant carbon footprint associated with assembling, placing, and maintaining each of these mega structures in the ocean. Also conveniently forgotten is that offshore wind power is comparatively expensive, may harm seabirds and marine life, and its fluctuating unpredictable output makes it unsuitable for providing the constant base load needed for a stable power grid. Additionally, the potential to negatively impact our billion-dollar tourism industry seems to have escaped any serious consideration."

Stop this nonsense.
