**Subject:** Wind Project

People flock to the ocean and the beaches to find tranquility. Looking at giant wind turbines only remind us of industry. Take the pristine views away and we lose all that the area has to offer. There are other better forms to improve our environment. Don't be so foolish to destroy one of the most special things we have in Delaware, our ocean view.

The turbines have too many obstacles to ensure they would be good for us: sea life, recycling, etc. I think you have to know this is the wrong choice.
