### Comments:

I am opposed to the US Wind project. I don't understand why DE needs to support this MD initiative. Why doesn't MD take on the responsibility for the entire project, including the cables required to bring the electricity onto the power grid? As a long time Delawarean, I have always been proud on how we have valued the DE seashore park and have done alot to keep it from industry .... It appears that MD now has better environment regulations, since theirs' does not allow these underground cables.... DE should take notice.... we are being taken advantage of by our more powerfull neighbor state.... and not to the benefit our DE citizens (where's the ROI? who is going to pay for this past 20 yrs when it starts breaking down??)... but just to promote this so--called green energy initiative.
