Comments:

Docket #2024-P-MULTI0007 - US Wind Project 1. From documents windfarm is being built in Maryland and transmission cables are going thru Delaware. Didn't Maryland reject the windfarm because it was too expensive? 2. Has the windfarm passed the 110% rule, where Delmarva Power bills cannot exceed 10% averaged over 3 latest years? 3. If 110% rule hasn't passed, why are permits being issued? Shouldn't state see if it is financially feasible before issuing permits? 4. Is state going to do this anyway, no matter the cost or how much citizens are against it?
