Comments:

Im against this project and DNREC should not allow the permitting process to move forward in an effort to protect teh beach and wetlands, protect local property values and to preservie the pristine nature of our Delaware coastline. The project is not cost effective for Delaware tax payers who will have much higher electric bills and who would ultamtly be responsbile financially if the companies who build these farms go out of business and cant maintain them or decommission them at the end of thier life (due to poorly writting contracts and bonding agreements) DNREC is our last line of defense in protecting our future here in coastal towns in Delaware. The leadership must choose not on political pressure but what is right for Delaware residents for protecting our environment and undue financial burdens of this ill conceived project. Thank you
