Comments on Docket #2024-P-MULTI-0007 -- US Wind Project

Name: Ruta Bucinkas.

Phone: 4439800292

Email Address: rutab354@gmail.com

Organization: No

Comments:

I strongly object to the issue of US wind company running high voltage offshore cables onto 3R's Beach or Tower Road in Delaware in order to support wind turbines which would be near the Tower Shores Beach community. I am very concerned that this would adversely affect the safety of the people living in or renting homes at the Tower Shores Beach community, as well as, the marine life. I believe that this will decrease our property values and destroy the tranquility that we enjoy in our homes and on our beach. It will also destroy the beautiful view that our residents and renters come here to enjoy. I am a long-term property owner in the Tower Shores Beach community. I do not understand why these cables need to be near our community when there are undeveloped areas where they could be placed. People come to our community to relax, not to hear loud equipment running, and work trucks coming and going. We have noise ordinances within our private Tower Shores Beach community. We do not want the cables that are barely buried near our beach.
