**Subject:** public hearing comment

### What is your name?

Shana Hendrickson

### What matter are you commenting on?

Docket #2024-P-

### What is your phone number?

3023358288

### What is your email address?

ShanaDoobyDoo@protonmail.com

Would you like to provide your email address?

### Do you represent a particular organization?

n/a

### Please enter your comments below.

In recent months both New Jersey and New York have abandoned similar offshore wind energy policies. The current administration here in Delaware still asserts the right to force choices upon many. The Delaware Electric Cooperative currently offers an alternative energy plan with a rate of less than one-half of one percent. We are already paying for policies we can't afford the best despite claims that would indicate otherwise. The Caesar Rodney Institute Center for Policy Studies has examined this legislation and determined that it is not in citizens' best interests. We have watched our "representatives" take our money and waste it far too much for everyone, not just divisive factions. It's time to start looking for real solutions instead of policies that take years to reverse the damage Governor Carney has done in this state during the last administration. The party agenda was more important than those who will not have the opportunity to vote in the next election. This is a disaster to that list.
