Comments:

My opposition to the proposed wind farm for the following reason. The current environmental regulations should not be bent to allow an industry to build an industrial power connection complex directly on our beaches on state park lands. It sets a dangerous precedent by allowing industrialization of public lands. If this is allowed then any industry can be allowed to capitalize on public lands and build any industrial infrastructure that they can come up with. It should be abundantly clear that our public lands are not a place to develop into an industrial complex. These are public recreational parks that are entrusted to the State Government to be protected from environmental destruction and industrialization. If more studies can be done, people will realize how harmful wind farms truly are.
