I know there's a loud minority against the wind energy project who are spreading a lot of misinformation, but I believe it will truly be beneficial to the surrounding area, especially for helping with advancement of growth in the area as well as working towards a sustainable future. Wind energy is heavily used in Europe and has already proven to be beneficial to them. Let's not be the ones playing catch up all the time and actually get ahead of the curve. I'm for the project and look forward to seeing it here.
