Comments on Docket #2024-P-MULTI-0007 -- US Wind Project

Name: Tracy Southard

Phone:

Email Address: tracy@oceanwilddesign.com

Organization:

Comments:

Offshore turbines are dangerous for our environment and destroy vital habitat. Each turbine causes large ecological damage to the environment in which it is placed. They kill whales, dolphins, fish and other marine life. They are also responsible for killing / maiming eagles and other birds and disturbing other wildlife. In addition, they are eyesores, inefficient, made with petroleum, and require petroleum for operation. In fact, each turbine has a higher Co2 footprint than it will ever recoup in its lifetime. Furthermore, they are not eco-friendly and not recyclable. They end up dumped in nature / landfills at the end of their short life. There is nothing redeeming about wind turbines. Please do not destroy animals, nature, our beautiful coast, and pristine ocean for these monstrosities.
