Comments:

I am opposed to bringing the cable ashore at 3Rs, dredging the Indian River and running power cables under the river for environmental reasons. The disturbance of the fragile and unique ecosystem has not been adequately studied. Birds and fish as well as horseshoe crabs will be impacted. The impacts on residents that live near the proposed work area have not been adequately explained as to how long the work will go on, the noise, vibration and river navigation. Businesses that are dependent on leisure and recreation will also be negatively impacted. Please vote no to slow this accelerated process down.
