Comments:

As a resident of Yorklyn Ridge which is located downstream from Quarry Walk, my neighbors and I are against DNREC allowing Quarry Walk to install underground tanks for temporary sewage containment. It was always our understanding that Quarry Walk would connect directly to the County sewer system. An underground system of tanks will increase the risk to all of us downstream from Quarry Walk. We have already seen an increase in stormwater flow and silt from Quarry Walk. Thus if any issues occur with the tank system, we are likely to be impacted. We would request that DNREC not grant the request for the tanks and require Quarry Walk to connect directly to the County sewer system before building homes. Thank you for your consideration.
