Comments:

Yorklyn Delaware is a very historical Treasure that must be preserved!!! It has given Delaware a real gift from the jobs that NVF Created close to 100 years ago, to the Auburn Heights Preserve to where people gather to enjoy the Stanley Steamers to train rides and Mansion tours. Donated to the conservation of this lovely valley. Our family has continued to contribute to Yorklyn but we have faced nothing but avoidance and lack of cooperation from DNREC Unfortunately ! We need to protect Delaware natural lands and communities from organizations that say they represent The Environment and our community. DNREC involvement in the NVF site and the Conservation of lands has not been there priority ! Rather they are working with developers to grossly adding lands to a historical site to have less rules for the environment. Not for the community interests but a development And developers Added to a master plan behind the residents backs to avoid county codes etc Storing sewage is just the beginning ! This whole project is based on lies backand door deals. The site is not appropriate for what has been planned The only reason Quarry walk exists is because of DNREC Participation and willingness to create the mess we now Have on our hands . I Ask DNREC to Stop include the community and retract the additions of new land to auburn valley master plan. NVF now auburn valley master plan is not the run away Disaster we see today. DNREC needs to fix the Mess they call natural resources.
