Comments:

I am commenting on the absolutely horrible possibility of 18,000 gallons of sewage holding tanks on Yorklyn Rd. It is ludicrous that this plan is even remotely considered viable. Sewage tanks that would have to be constantly pumped out are an abomination, especially since the cost of the homes are exorbitant anyway. How such a plan can move forward is unfathomable. The potential for disaster for residents of the community and the environment is huge, let alone the smell! I encourage you to reject this plan Respectfully, Jan Williams A resident of the area who patronizes local businesses and amenities and would like to preserve the nature of the community
