Organization:

Comments:

Permitting the use of temporary holding tanks at Quarry Walk absolutely underscores a lack of foresight and consideration for the local community by the developer. By prioritizing their return on investment (ROI) over the necessary infrastructure and the well-being of residents, the developer has created avoidable issues. It's crucial for such projects to balance financial objectives with the responsibility to ensure that the necessary infrastructure is in place, thereby safeguarding the safety and convenience of the entire area. It is the responsibility of DNREC and NCC to insure this balance is maintained. Furthermore, this balance is key to sustainable and responsible development. If there ever was an example of putting the cart before the horse, this is it.
