Comments:

Hello, I am a longstanding Delaware based business owner who would have an extremely negative impact by this bill passing. My company specializes in Flooring, and the average person would say this would have no impact on my business.. questioning how would this bill effect my business.. and its simple, this bill will result in a large decrease in new home construction in DE. With the current market, this will exacerbate affordability and mortgage qualifying issues would eliminate a large portion of buyers, adding unnecessary stress and added costs to those able to now just barley limp into their new home purchase. I beg DNREC to take into consideration the vast scale of negative impact adopting this proposed energy code would bring. It goes across the entire board with any and all affiliated with new construction. Delawares economy does not need any more road blocks or hurdles to jump over in the construction world, I plead with you as a business owner and proud Delawarean, to re consider and fully digest the negative effects this would have on individuals, families, employees and employers and obviously the states economy as a whole. I greatly appreciate you taking the time to read my comments, and i wouldn't hesitate to take a phone call to discuss into further detail if necessary.
