RE: 2101 Regulations for State Energy Conservation Code

Since 2007, ChargePoint has been committed to making it easy for businesses and drivers to go electric with one of the largest electric vehicle (EV) charging networks and a comprehensive portfolio of charging solutions. ChargePoint's cloud subscription platform and software defined charging hardware is designed internally and includes options for every charging scenario from home and multifamily to workplace, parking, hospitality, retail, corridor, and fleets of all kinds. ChargePoint's primary business model is to sell our integrated charging software and hardware solutions directly to site hosts and provide services that enable them to provide charging services that align with their specific needs.

ChargePoint supports the Department's adoption of the updated codes as proposed in the December 2025 issue of the Register of Regulations. ChargePoint comments Delaware's inclusion of Appendix RE EV Charging Infrastructure as the basis of its proposed regulations. Appendix RE as amended will ensure Delaware's housing stock is prepared for the transition to vehicle electrification. Providing charging where people live is a convenient and cost-effective way to encourage vehicle electrification.

Sincerely,

A handwritten signature in black ink, appearing to read "Justin Wilson".

Justin Wilson
