Comments:

E-bike regulations. I'm a senior citizen and the e-bike industry got mo on the move again and got me biking on public bike/walking trails. Now you are trying to take this activity from me for no "real reason". Your e-bike classifications are invalid. Class one is a pedal bike, class two is up to 20 mph and three is over 20. Question class 1 has no mph limit. So you know how fast a pedal 10 or 15 speed bike can go? I know greater the 20 or 15 mph - but with your reasoning that's ok or you don't care? You avoiding the real issue and that's the operation of ANY bike and not the bike. Any bike can go 2 mph or 25. Don't restrict the type of bike. Crack down on the operators. This is how it works with cars on the highway. Please think about what you implement and everyone it may negatively impact.
