Subject: Swale in Wynn Wood pond 1

I am very concerned about the overgrowth in the pond 1 in Wynn Wood. It is just getting out of hand. I have never had a mice issue or a woodchuck or ground infestation. This year the swale is well over 3 ft tall. Perfect breeding ground. Also, people are dumping in the swale. HOA is always saying they are doing "proper maintenance " This is NOT proper maintenance. Is there anything you can do about my concern? Thank you
