Comments:

Dear DNREC, I compost and I urge you to do everything that you can to issue regulations that make it easier for people to compost in our state. Composting is a critical solution to reducing waste, addressing climate change, improving public health, and supporting local and sustainable economies. Current permitting rules create barriers for both community programs and new small businesses offering food scrap pickup services. Please do more to make our state promote composting. Thank you for your time and consideration. Best, Liz Ryan
