Comments:

I fully support composting here in the first state. Composting greatly reduces the amount of waste that goes into our landfills. We should be bettering our environment and this is such a simple way to do so. I previously lived in Los Angeles county where composting became a law. We reduced the amount of trash in our barrels significantly. Delaware should follow and allow small businesses and communities to compost. Composting community that composting is an essential part of addressing issues of waste, climate change, public health, and socioeconomics.
