City of Dover, Kent County, Delaware**

Dear Ms. Cole,

Environmental Resource Insights (ERI) is writing on behalf of Trash Gurls, LLC. to provide you with the Department of the Army Permit Application and plans for the proposed installation of a 3-inch natural gas service line which is needed for the development of a storage yard and materials handling facility within an existing industrial park. The gas service line is to be installed under a roadside man-made drainage channel with intermittent flow classified as a "Waters of the U.S." using trenching methods. The temporary impact related to the installation is 0.0015 acre. The Corps of Engineers advised me that a Coastal Zone Consistency Determination from your Program is required for this part of the project. The project description and a response to applicable Coastal Zone Management Program Policies is provided in the attached Coastal Zone Management Act Federal Consistency Form. Trash Gurls, LLC. requests the issuance of a Coastal Zone Consistency Determination from your program. Upon your review of this information, I am available at your convenience should you have any additional questions.

Sincerely,

ENVIRONMENTAL RESOURCE INSIGHTS

Edward M. Launay
Senior Professional Wetland Scientist No. 875, Society of Wetland Scientists

Enclosures: ACOE NWP 27 & 29 Pre-Construction Notice
8 ½" x 11" Project Plans
