Dover, DE 19904

Subject: USDA  
REAP Staff  
John T. Brown  
4795 Milford Harrington Hwy, Harrington, DE 19952

Dear Delaware Coastal Programs:

John T. Brown is seeking funding from the USDA under its REAP Program for the solar project at 4795 Milford Harrington Hwy, Harrington, DE 19952.

The project consists of installing (120) ground mounted solar panels on open ground space at the mentioned project location. The purpose of installing the solar system is to offset the remaining onsite farm's eligible annual electric consumption supplied by Delmarva Power that is not covered by the existing solar onsite.

If the USDA REAP Program elects to fund the project it is subject to your review for federal consistency.

Please review the project and the enclosed maps. After completing your review, please provide your federal consistency determination/certification.

Please submit your determination/certification or request for additional information **electronically** within 30 days of your receipt of this request to USDA REAP. Should you have any questions, please contact myself or Colleen Reed at the USDA.

Sincerely,

Dawn Cage  
Process Manager
