---

Dear Secretary Patterson,

My name is Meme S [REDACTED] and I oppose the proposed data center (Project CZA-448SD). I urge DNREC to deny this project under the Coastal Zone Act.

This facility would consume approximately 1,200 megawatts—nearly half of Delaware's summer peak demand. It would require millions of gallons of water daily and operate hundreds of backup generators continuously.

The scale and industrial nature of this development represents exactly the type of heavy industrial use the Coastal Zone Act was designed to prevent. The environmental impacts on air quality, water resources, and energy infrastructure are incompatible with CZA protections for Delaware's coastal zone.

I urge DNREC to prohibit this project.

Thank you,  
Meme S [REDACTED]
