---

Dear Secretary Patterson,

I am a longtime [REDACTED] resident, retired. Through my membership in [REDACTED], I have been able to research and better understand the impact of the proposed Project Washington to our already fragile coastal environment. I am sure you will have heard more detailed letters from others, but I feel it's important as a regular citizen to put in my two cents.

Based on my reading of the Coastal Zone Act, Project Washington by its scale, structure, location and most importantly, its potential environmental impacts, is exactly what this act intended to preclude from being developed. Please enforce this Act and prohibit this project. Thank you for your consideration and thank you for protecting our coast.

Bruce R [REDACTED]
