Subject: Project Washington, River Road

I am writing to ask you to reject the application for Project Washington because I believe it's purpose and components are incompatible with the Coastal Zone Act and rules.

The proposed facility is too heavy, and it is not a grandfathered project. I have concerns for noise and air pollution, adverse impacts to wetlands and the Red Lion Creek tributaries, as well as the projected extreme impacts to the electrical grid. We have concrete examples about how these data centers operate in Virginia, and the regrets of the communities that have been impacted. The CZA is a protective law, and all approved projects must do no harm.

Thank you for your consideration of this matter and the work you do every day to protect the Delaware environment.
