Subject: Support for the Approval of Project Washington
Date: Monday, January 12, 2026 1:59:24 PM

To Whom It May Concern,

I am writing to express my strong support for the approval of Project Washington. This forward-looking initiative incorporates a state-of-the-art design, including a closed-loop cooling system that requires minimal water once operational, underscoring a strong commitment to environmental responsibility. The facility has been engineered to operate at approximately 55 decibels—roughly 25 decibels quieter than typical highway noise—ensuring minimal impact on the surrounding community.

Project Washington represents precisely the type of strategic investment that can position Delaware as a leader in technological innovation. The project is expected to generate thousands of jobs, produce substantial revenue for both the state and county, and do so while maintaining environmental stewardship as a core principle.

I strongly encourage the advancement of this project, as it exemplifies responsible growth, sustainable development, and long-term economic benefit. Project Washington offers Delaware an opportunity to embrace the next phase of technological progress and allow its residents to share in the benefits of this emerging and exciting era.

Respectfully,

Ian C [REDACTED]
