To whom it my concern

I am writing to express my strong support for Project Washington. This innovation project features a closed-loop cooling system that uses minimal water once filled. It is designed to be highly environmentally friendly, operating entirely on electricity, with backup generators only utilized an emergency situations. The facility will operate at 55 decibels, which is 25 decibels lower than a typical highway, ensuring minimal noise impact.

Project Washington represents the type of development Delaware has so long sought-one that generates thousands of jobs, produces significant revenue for the state and county, an and does so with Little to no environmental impact. I strongly encourage the advancement of this project, as it exemplifies, responsible growth, and sustainable progress.

Thank you for your time
