---

To Secretary Gregory Patterson, and others whom it may concern,

My name is Jordan D [REDACTED]. I have been a Delaware resident [REDACTED], I'm a taxpayer, a voter. Though I've been in [REDACTED] [REDACTED] I've been making moves with my fiance to move in with a dear friend into [REDACTED] helping with bills and to build her community. The decision on Project Washington directly effects me and my future.

My position is to oppose the permit for Project Washington. I take this move very seriously, not only for myself, but on behalf of my neighbors and family, and I hope you've taken the time to consider what this data center will do to our county.

Communities across the nation that have already experienced the pattern of these data centers have all been exposed to the same danger. The very nature around them is tainted with poisoned water. With rising costs every day which families and individuals struggle to keep up with, it's an additional and unnecessary tab to an already strained budget. This project doesn't build communities. It leads with false hope and creates hardship for the already existing community.

New Castle County communities would inherit the noise, diesel generators, transmission lines. Delaware defended our coast for half a century. The Coastal Zone Act drew a line: heavy industry stops here. Project Washington crosses that line. It violates the law. It threatens our environment. It burdens and infects our people.

Secretary Gregory Patterson, as you make your review, I urge you to look out for your community and mine.
