To whom it may concern,

I am writing to express my strong support for Project Wilmington. This innovative project features a closed-loop cooling system that uses minimal water once filled. It is designed to be highly environmentally friendly, operating entirely on electricity, with backup generators only utilized in emergency situations. The facility will operate at 55 decibels, which is 25 decibels lower than a typical highway, ensuring minimal noise impact.

Project Wilmington represents the type of development Delaware has long sought—one that generates thousands of jobs, produces a significant revenue for the state and county, and does so with little to no environmental impact. I strongly encourage the advancement of this project, as it exemplifies responsible growth and sustainable progress.

Thank you,
Martin D. [REDACTED], [REDACTED]
