---

Dear DNREC,

Project Washington denies the Coastal Zone Act. Delaware's coast is one of its most precious resources, and it needs protection from YOU. There should be "no negative environmental impact" on our coastal zones, and Project Washington would absolutely violate this. We DO NOT want data centers. We would clean water. We want no toxic emissions. Help. Please. NO DATA CENTERS would be ideal, but absolutely none near our coastal regions.

Sincerely,

Julianne H [REDACTED]
